NoaCG SVG templates

Ten ready-made broadcast graphics in one clean style. They are starting points: make one yours in Illustrator, save it as SVG and import it into NoaCG.

In this folder

- **SVG**: the templates. Each SVG is its own editable source; open it directly in Illustrator or Inkscape.
- **Previews**: a picture of every template. The quiz, scoreboards and game timer include more states.
- **templates.json**: the list of templates and what each one does in NoaCG.

Open, edit, export, import

- First install the **Manrope** font, free from fonts.google.com. Pink text in Illustrator means the font is missing.
- Open an SVG in Illustrator (File > Open) and open the Layers panel (Window > Layers).
- Every file has up to three layers. **Text** holds live text. **Moments** holds hidden groups that NoaCG shows at the right time. **Board** holds the shapes that never change.
- Change words, fonts, colours and shapes freely. Keep the names in the Layers panel, such as `Team 1` and `Flash 1`: NoaCG uses them to know what each part does.
- Keep text as live text. Do not outline it or turn it into a picture.
- Save with File > Save a Copy > SVG. Tick **Use Artboards** and keep **Font: SVG**.
- In NoaCG, choose New graphic > Import graphic and drop the SVG. Check **What it does**, then put the graphic in a production.

The templates

Template	What it does in NoaCG
Lower third	Type Name and Role. Take, then Update for the next person.
Game timer	A corner countdown. Clock is minutes: the drawn `1:00` is one minute. Take starts it; Pause, Start and Reset control it. Warning shows near the end and Time up at zero.
Show countdown	A full-screen countdown before the show. At import, choose how Clock counts: from its time, or to a set time such as 18:00.
Quiz	Type the question and answers, choose the correct answer, then Take. Select answer, Lock it in and Reveal correct run the round.
Game rules	A full-screen card with a Title and Rule 1 to Rule 5.
Be back soon	A full-screen break card. Retype Title for a technical problem.
Scoreboard, 2 players	Change team names. +1 and -1 change each score; +1 shows that team's flash. New game resets the scores.
Scoreboard, 4 players	The same controls for four players along the top of the screen.
Winner	A centred card with Title, Name and Subtitle. Choose an entrance such as Pop when you import.
End credits	Paste the full list of roles and names in playout, one per line. `Director: Alex Rivera` gives a role and its name.

Layer names

From the top of the Layers panel. A number or letter after a space says which row a part belongs to.

Template	Text	Moments	Board
Lower third	`Name`, `Role`	none	`Panel`, `Role box`
Game timer	`Title`, `Clock`	`Timer bar` (visible), `Warning`, `Paused`, `Time up`	`Panel`, `Track`
Show countdown	`Title`, `Clock`, `Subtitle`	none	`Panel`, `Clock box`
Quiz	`Question`, `Answer A` to `Answer D`	`Selected A`, `Correct A`, `Wrong A` per answer; `Locked in`	`Question box`, `Answer box A`, `Letter box A`, `static:Letter A`
Game rules	`Title`, `Rule 1` to `Rule 5`	none	`Panel`, `Accent`, `Rule box 1`, `Number box 1`, `static:Rule number 1`
Be back soon	`Title`, `Subtitle`	none	`Panel`, `Accent`
Scoreboards	`Team 1`, `Score 1`, and so on	`Flash 1`, and so on	`Team box 1`, `Score box 1`
Winner	`Title`, `Name`, `Subtitle`	none	`Panel`, `Title box`, `Confetti`
End credits	`Heading`, `Credits`, `Credits 2`, and so on	none	`Panel`, `Accent`

Moments items except the timer bar are hidden groups: show one with its eye icon, edit it, hide it again before saving. Fixed words on the Board start with `static:`.

Make it your own

- **Colours**: select every shape of one colour with Select > Same > Fill Color, then pick a new colour.
- **More or fewer players**: in the 4-player scoreboard, select one player's `Team box`, `Score box`, `Team`, `Score` and `Flash` and copy them. Rename the copies to the next number, such as `Team 5` and `Score 5`. Delete a player's five parts to remove them. For more than five players, make each player narrower so the row still fits the screen.
- **More or fewer rules**: copy a rule's `Rule box`, `Number box`, `static:Rule number` and `Rule` text, and rename them with the next number.

Numbers and clocks

Scores and clocks are one live text each: `Score 1` shows `0`, `Clock` shows `1:00`. Do not split digits into separate texts. Keep the plate behind a score wide enough for three digits, and the clock plate wide enough for the longest time you need.

Animation

Imported SVGs do not carry their own animation. NoaCG adds the entrance and exit you choose at import, such as Fade, Slide or Pop. The winner's confetti is drawn, not animated. Names in these templates are made up.
