

Make your own show graphics

Five graphics for one quiz show. Open them, copy them, make them yours, and run them live in NoaCG.

What is in the folder

- **Illustrator**: the five files you open and change.
- **SVG**: the same five, saved for NoaCG. Import these first to see how it works.
- **Previews**: a picture of every graphic, and of every look the quiz and the score can have.

Make your own

- Open a file from the Illustrator folder.
- Change the colours, fonts and shapes as much as you like. Keep the layer names.
- Text = what you type on air. Moments = hidden, NoaCG shows them. Board = stays as drawn.
- Pink text in Illustrator means the font is missing. Install Oswald from fonts.google.com.
- Save: File > Save a Copy > SVG. Tick "Use Artboards". In SVG Options, keep Font on SVG and press OK.
- Go to noacg.studio/app, press New graphic, then Import graphic, and drop in your SVG.
- Put all five in the same production. Then run the show from the production's page.

On air

- **Show intro**: type the Title and Subtitle. Take, then Out.
- **Name tag**: one graphic for everybody. Type the Name and Role and press Take. Type the next person and press Update.
- **Quiz**: type the question and four answers, pick the correct one, Take. Then Select, Lock and Reveal.
- **Score tracker**: type both names. +1 and -1 change the score.
- **End credits**: paste the whole list into one field. A line ending in ":" is a title, and the names go under it. Take, and it rolls.

Credits to paste

The credits file already holds the Finnish list. Here is the same crew in English. "Title: Name" on one line works too, and an empty line starts a new part.

Host: Maija Meikäläinen	Sound: Timo Toivonen
Guests:	Lighting: Kaisa Koski
Ville Virtanen	Vision engineer: Heikki Honkanen
Aino Aalto	Graphics: Jussi Järvi
Camera:	Set design: Noora Nurmi
